Stephen P. Morse

a ZOOM presentation on

1950 Census: Searching with and without a Name Index

The 1950 census was released on April 1, 2022. It does not have a name index. So finding people in the census will involve searching by location instead. Even when a name index becomes available, there will still be many reasons for doing locational searches. The census is organized by Enumeration Districts (EDs), so the location needs to be converted to an ED before the census can be accessed. The One-Step website contains numerous tools for obtaining EDs. This talk will present the various tools and show circumstances in which each can be used.

Stephen Morse is the creator of the One-Step Website for which he has received both the Lifetime Achievement Award and the Outstanding Contribution Award from the International Association of Jewish Genealogical Societies, Award of Merit from the National Genealogical Society, first-ever Excellence Award from the Association of Professional Genealogists, and two awards that he cannot pronounce from Polish genealogical societies.

In his other life Morse is a computer professional with a doctorate degree in electrical engineering. He has held various research, development, and teaching positions, authored numerous technical papers, written four textbooks, and holds four patents. He is best known as the architect of the Intel 8086 (the granddaddy of today's Pentium processor), which sparked the PC revolution more than 40 years ago.

Tuesday, May 17th, 2022 via Zoom 1:00 pm - sign on 10 mins. early

All are welcome to attend this Zoom meeting. Non-members: To receive zoom meeting details send email to whidbeygensearchers@gmail.com with name and email address by May15, 2022.

WIGS' membership for one year for one person is \$15 or \$20 for a couple living in the same household. Mail membership form (from website- www.whidbeygensearchers.org) along with a check to P.O. Box 627, Oak Harbor, WA 98277.
